P1 VILLA

BREATHTAKING MOUNTAIN AND GOLF COURSE VISTAS

**867 M² VILLA
5 BEDROOM SUITES**

P1 VILLA

The twin outlooks belonging to this outstanding villa make P1 a remarkable and extremely desirable family retreat.

Your luxury home, strategically located on the resort's 18-hole golf course, is designed to maximise views of the pristine fairways and those of the magnificent Atlas Mountains, the jewel in North Africa's crown. Inside, with its impressive ceiling heights, internal Moroccan patio with riad-style water feature, and generous, open plan living spaces, the villa exudes style and grandeur. The modular design allows you to create a space that suits your family by adapting the number of rooms if needed. Sliding doors lead you outside to a captivating lush garden of palms, olive trees and Moroccan cacti surrounding a dramatic 25 metre long pool.

<i>External doors and windows</i>	External doors and windows with aluminium profiles and double glazing
<i>Swimming pool</i>	Slate

Some items are mandatory in the rental program. For more information please contact your Sales Advisor.

OUR CONSTRUCTION PRINCIPLES

We use double partition walls comprising an outer skin of pumice stone blocks and an inner layer of hollow terracotta bricks, with the air pocket in between providing improved thermal insulation. This technique provides greater temperature stability, resulting in energy savings.

Interior doors and closets are finished in natural oak or walnut.

All external windows and doors have aluminium frames, and double glazing for optimum heat and sound insulation.

Surfaces and architectural finishes incorporate natural, attractive local materials such as stone, marble, terracotta, lime and plaster.

Cladding and façades are inspired by tabiyya rammed earth, with float-finished plaster painted in earthy shades.

Large picture windows are accentuated by sunscreens made of metal and wood.

The fireplaces combine beauty with functionality in the main bedrooms and living areas.

THE PLANT AND EQUIPMENT

Underfloor heating/cooling.

Air conditioning can be used for heating or cooling, remaining quiet and visually discreet throughout.

Domestic hot water is produced using solar power, with an electric backup system.

The infinity pool incorporates salt water chlorination system and space for a pool cover roller.

Each villa is equipped with a fibre-optic network, and is set up to receive telephone/ADSL and fibre-optic broadband.

A home automation system is pre-installed in each villa.

LED lighting indoors and out.

All on-site plant and equipment (electrics, plumbing and sanitary facilities) is designed with both aesthetic appeal and compliance with current standards in mind.

Custom kitchens are fitted throughout.

The villa's drinking water is treated with a water softener.

OPTIONS

The swimming pool water is warmed by a heat pump.

A motorised pool cover ensures safety and maintains water temperature.

Optional guest annex: an independent building with space to accommodate additional facilities such as extra bedrooms, a hammam, a massage room or a gym, according to your needs and the footprint of your plot.

Two distinct decor styles, 'Berber Chic' or 'Luxury and Comfort', to suit your taste and the architectural finishes of your villa.

The façades are covered in traditional plaster inspired by tabiyya rammed earth, made of cement, earth, straw and lime.

The gate is remote-controlled and motorised.
