ROYAL PALM MARRAKECH

A1 VILLA
A GRAND VISION OF LUXURY

1,262M² VILLA
5 BEDROOM SUITES

A1 VILLA

The ultimate property within the Royal Palm Marrakech luxury resort, an A1 villa commands the most breathtaking views across the pristine 18-hole golf course to the snow-capped Atlas mountains.

Occupying the largest plots of the entire resort, villas A1 are spectacular and versatile homes designed with generous ceiling heights and room sizes, set within expansive private gardens with 70 metres of golf course frontage. Villa A1 combines the aesthetic of a traditional Berber home with contemporary layouts and luxurious finishes. The emphasis is on creating a natural flow between inside and outside, enhancing an easy, relaxed way of living. An A1 villa gives you the option of building a one/two bedroom upper floor, a 3-bedroom guest house, and an entertainment space built to your specification to include perhaps a gym or a bar, a home cinema or an indoor pool. The choice is yours. Surrounding the villa are beautifully landscaped mature gardens with a 25 metre infinity pool and stunning water features.

A1 VILLA

A1 VILLA

For more information please contact your Sales Advisor.

OUR CONSTRUCTION PRINCIPLES

We use double partition walls comprising an outer skin of pumice stone blocks and an inner layer of hollow terracotta bricks, with the air pocket in between providing improved thermal insulation. This technique provides greater temperature stability, resulting in energy savings.

Interior doors and closets are finished in natural oak or walnut.

All external windows and doors have aluminium frames and double glazing for optimum heat and sound insulation.

Surfaces and architectural finishes incorporate natural, attractive local materials such as stone, marble, terracotta, lime and plaster.

Cladding and façades are inspired by tabiyya rammed earth, with float-finished plaster painted in earthy shades.

Large picture windows are accentuated by sunscreens made of metal and wood.

The fireplaces combine beauty with functionality in the main bedrooms and living areas.

THE PLANT AND EQUIPMENT

Underfloor heating/cooling.

Air conditioning can be used for heating or cooling, remaining quiet and visually discreet throughout.

Domestic hot water is produced using solar power, with an electric backup system.

The infinity pool incorporates salt water chlorination system and space for a pool cover roller.

Each villa is equipped with a fibre-optic network and is set up to receive telephone/ADSL and fibre-optic broadband.

A home automation system is pre-installed in each villa.

LED lighting indoors and out.

All on-site plant and equipment (electrics, plumbing and sanitary facilities) is designed with both aesthetic appeal and compliance with current standards in mind.

Custom kitchens are fitted throughout.

The villa's drinking water is treated with a water softener.

OPTIONS

The swimming pool water is warmed by a heat pump.

A motorised pool cover ensures safety and maintains water temperature.

Optional guest annex: an independent building with space to accommodate additional facilities such as extra bedrooms, a hammam, a massage room or a gym, according to your needs and the footprint of your plot.

Two distinct decor styles; 'Berber Chic' or 'Luxury and Comfort', to suit your taste and the architectural finishes of your villa.

The façades are covered in traditional plaster inspired by tabiyya rammed earth, made of cement, earth, straw and lime.

The gate is remote-controlled and motorised.
